## SUMMARY

As a dedicated software engineer with 3 years of experience, I specialize in Python, focusing on data scraping and analysis, with additional back-end development expertise. I am fluent in English and Serbian and have a passion for traveling, reading, learning, and technology. I am eager to advance my career in software engineering by joining a prominent company.

## PERSONAL INFORMATION

- Name: Aleksa
- Surname: Markovic
- Born: 19/09/1998
- Gender: Male (He/Him)
- Location: Kragujevac, Serbia

## EXPERIENCE

### Power Lever

Software Engineer

August 2021 - September 2023,  
Kragujevac, Serbia

#### Software development and Automation

- Worked on automating daily tasks of other team members.
- Developed back-end features for client websites to enhance customer experience.
- Wrote software for both in-house and external projects using Python, including implementing UI for some of them.
- Mainly focused on Python, utilizing libraries such as pandas, bs4, matplotlib, PyQt5, tkinter, requests, and threading.
- Used JavaScript for back-end development on Knack, where the website was hosted.

### Astora Serbia

Python Developer

September 2023 - July 2024,  
Novi-Sad, Serbia/Remote

#### Python development and Data Analysis

- Developed various Python scripts for data gathering.
- Used multiple libraries for data processing and analysis.
- Led several projects solo, achieving complete customer satisfaction.
- Fully focused on honing my Python skills and improving as a developer.
